

Installation Instructions for PC- ControlLAB 3 Software for Process Control and Loop Tuning

Technology Training that Works

These are installation instructions for the PC-ControlLAB 3 software.

You should have been provided with the zip archive named PC_ControlLAB_3_with_exercises.zip. This contains both the installer for the program along with the files needed for the IDC practical exercises using this program.

The contents are as follows –

```
# Archive C:\temp\PC_ControlLAB_3_with_exercises.zip

To install the software, please unpack the archive and double-click on setup.exe. The installer will then start. For the registration keys, please use the ones contained in the REGKEY.txt file in the archive. A menu shortcut will be created by the installer – to start the program itself, just click on the menu item.

All of the files required for the Wade & Associates exercises are automatically installed by PC-ControLAB 3. The files required for the IDC practical exercises are contained in the IDC Practicals directory in the archive. You may need to copy these across to the directory that PC-ControLAB 3 was installed in. Each directory is numbered to match with the practical exercises found in the text.
