

# PC-ControLAB™ 3

## LABORATORY EXERCISES

About the Laboratory Exercises  
About the Predefined Process Models  
About the Control Strategy, Model, Tuning Packages

### Exercises

- 1 Process Dynamic Characteristics
- 2 Control Valve Characteristics
- 3 Valve and Positioner Response
- 4 Flow Loop Characteristics
- 5 Temperature Control Loop Characteristics
- 6 Pressure Control Loop Characteristics
- 7 Level Control Loop Characteristics
- 8 PID Controller Characteristics
- 9 Tuning from Open Loop Tests
- 10 Tuning from Closed Loop Tests
- 11 Improving "As Found" Tuning
- 12 Tuning Liquid Level Control Loops
- 13 Using Scheduled Tuning
- 14 Ratio Control
- 15 Cascade Control
- 16 Additive Feedforward Control
- 17 Multiplicative Feedforward Control
- 18 Override Control
- 19 Forward Decoupling
- 20 Inverted Decoupling
- 21 Model Based Control
- 22 Anti-Reset Windup (Batch Switch)
- 23 Drum Level Control
- 24 Familiarity with Model Predictive Control
