Instructions for accessing SMC PneuDraw

Please note: You cannot do simulation using PneuDraw. You can only create circuit diagrams using this program.

1. **Locate the Lab you wish to use to access the software.**

2. **On the Remote Lab Desktop (after you have logged in), please locate the software.**

If you are using Lab 2:

If you are using Lab 4:

3. **Open the software and to familiarise yourself, click on the Help function > Help Topics**

If a particular symbol is not available in the symbol library to pick and drag on to the screen, please look for the required symbol in a folder located on the Remote Labs (desktop) called Pneumatic symbols Library.
